A IMPROVING THE TEMU MOBILE APPLICATION

GOAL

Based on our data gathering, all respondents have used the Temu mobile application and reported negative experiences.

Our main goal is to improve the overall user experience by addressing issues related to promotional pop-ups, notifications, application navigation, and technical performance.

Our group aims to propose a more organized, user-friendly, and convenient shopping application that allows users to browse products without unnecessary interruptions.

B GROUP ROLES AND POSSIBLE CHALLENGES

Interviewer/Researcher: Ryan Marbee Angeles
Interviewees: John David Maniego and Wayne Ruiz

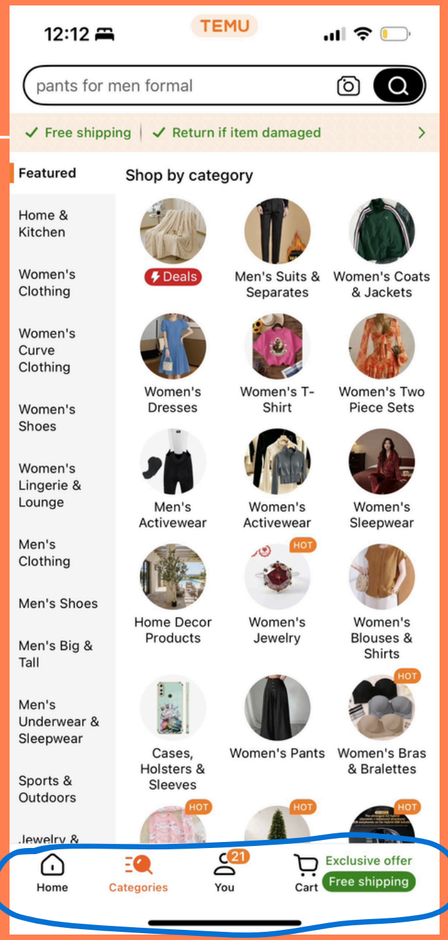

Based on our respondents' negative experiences, our group will focus on investigating promotional interruptions, application navigation difficulties, technical issues, and the overall shopping experience.

One challenge is identifying which features need improvement while maintaining the application's existing shopping functions.

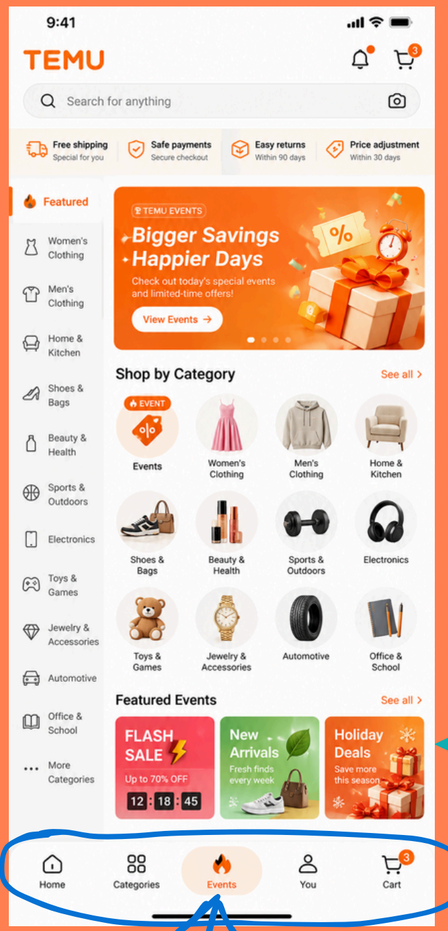

Since Temu is an established application, our group will propose a UI/UX redesign rather than directly modifying the original application.

The information gathered from our respondents will guide us in identifying suitable improvements and refining our redesign goals.

DATA GATHERING TECHNIQUES

Interview
Our group conducted online interviews with the respondents to gather detailed information about their experiences, complaints, and suggestions regarding the Temu mobile application.

Questionnaire
We used Google Forms to collect feedback about promotional pop-ups, notifications, application navigation, technical issues, and overall user satisfaction.

Observation
Our group examined the Temu mobile application to identify possible usability issues, particularly promotional interruptions, navigation difficulties, and the organization of the interface.

Triangulation
We will compare the results of the online interviews and questionnaires with our observations to identify common problems and determine which features need improvement.

D CONSENT FORM

We did not create any consent forms because we are close friends like super like bffs so we felt like we no longer needed the consent form because we agreed to participate on this activity on our own merits.

DATA GATHERING PROGRAM

Our group conducted online interviews, with the group leader acting as the interviewer and the other members as interviewees. We asked questions about their experiences, complaints, and suggestions regarding the Temu application.

Our group used Google Forms to collect data through multiple choice, yes or no, and open-ended questions about promotional pop-ups, navigation, technical issues, and overall user experience.

Our group used direct observation by examining the Temu application, focusing on promotional pop-ups, product searching, and navigation.

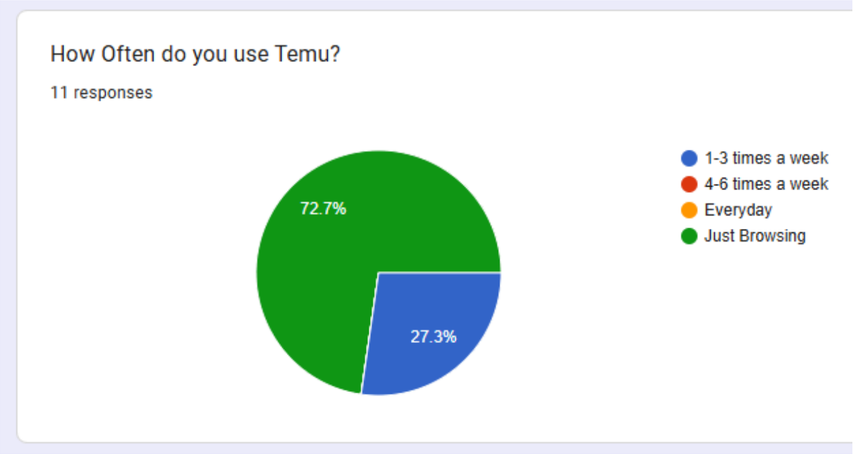

DATA GATHERING PROGRAM

Our group answered the survey that includes 10 questions that relates to the psychology of the user while using the app.

This especially features and presents the issue that is currently present in the Temu app.

This and the following slides will present the responses and the thoughts of the participating interviewees to show the user experience towards the app.

We did not have any online conferencing because we performed the whole process of the survey while we are together face to face

DATA GATHERING PROGRAM

Can you describe your overall experience using Temu?

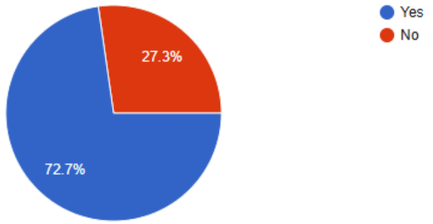

11 responses

- No personal experience, but base on the videos I've seen online they dont recommend us ordering on temu
- Temu is not a recommended shopping app because some of the products are fake and they're not what's described in the pictures
- it's very tough to navigate through the app
- Like a normal application
- Overall it is good, there is room for improvement
- It's okay however at times it can be annoying because of the unnecessary ads and the confusing interface and as well as the fact that sometimes the items we receive is not as described
- Easy to use
- madaming ads hirap mag navigate dahil sa ads

Have you encountered any problems while using temu?

DATA GATHERING PROGRAM

Can you describe a situation where a problem inside Temu has occurred?

11 responses

a pop up thing or ad shows up multiple times

One problem I experienced was that some items took longer to arrive than expected

Low quality or durability of the item

Shipping is too long

situation where a problem occured, too much ads were present on the screen and difficulty of navigation

Too much loading and sometimes freezing

maybe the sudden ad pop

sometimes it usually pops up a significant amount of ads and it makes the interface hard to navigate through

None

DATA GATHERING PROGRAM

How would you describe your experience while navigating through the Temu app?

11 responses

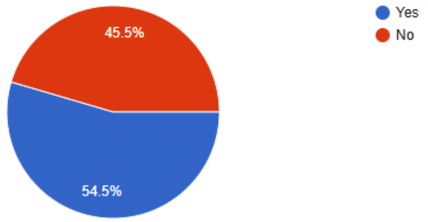

- It seems simple enough
- Only scam promos
- it’s very hard and difficult because of the pattern of the app design and the ads
- Not that great
- Good
- it's kinda hard especially when there's too much going on with the app
- Easy to navigate but too many buttons
- mahirap kasi may mga pop up ads tas nag lalag na dahil sa dami ng events hinde naman totoo
- Nakakahilo hindi ko na alam kung nasaan ako minsan - translated in tagalog

DATA GATHERING PROGRAM

Have you experienced any technical issues while using the Temu app? (e.g Slow Loading, App Freeze / Crash, Unresponsive Buttons)

DATA GATHERING PROGRAM

How easy or difficult it is to close promotional pop-ups inside the app?

11 responses

- it is too difficult because the “x” button is too small
- It was fairly easy to close the promotional pop-ups, but there were times when they appeared repeatedly and became a little annoying
- It easy
- It’s too difficult because of the size of the X button
- very very very very hard
- Very hard
- the close button for pop ups are small
- very difficult because it can come simultaneously
- 10 seconds to close the ads

DATA GATHERING PROGRAM

How accurate is the item you purchased to exactly look like the same as the one they gave you?

11 responses

- It seems more low quality than the other ordering platforms
- Not accurate
- very false from what was advertised
- It's usually not expected on image compared to delivered item
- way off on the original
- sometimes it can be accurate but still a fake replica but sometimes it's really not as described
- Bout 80%
- i will rate to 7/10
- 7/10 skill issue

DATA GATHERING PROGRAM

If you could redesign or improve the features of Temu? What would you do and why?

11 responses

- i would remove the annoying ads
- I would reduce the number of promotional pop-ups and make the app less cluttered. This would make browsing easier and more convenient for users
- Lessen the misleading online deals
- Stop the fake promos and fake wheel of prizes, and just focus on selling stuffs accurately not sell fake products just to get the attention of people
- i would remake the app design and as well as remove unnecessary to improve user experience
- For me, I would boost the responsiveness of the temu because every customer starts their shopping from there
- The design of its app and will lessen the pop up ads
- i would reduce the advertisements and recreate the dashboard of the app so that it's more user friendly

STUDY EXECUTION & SCOPE LIMITATION

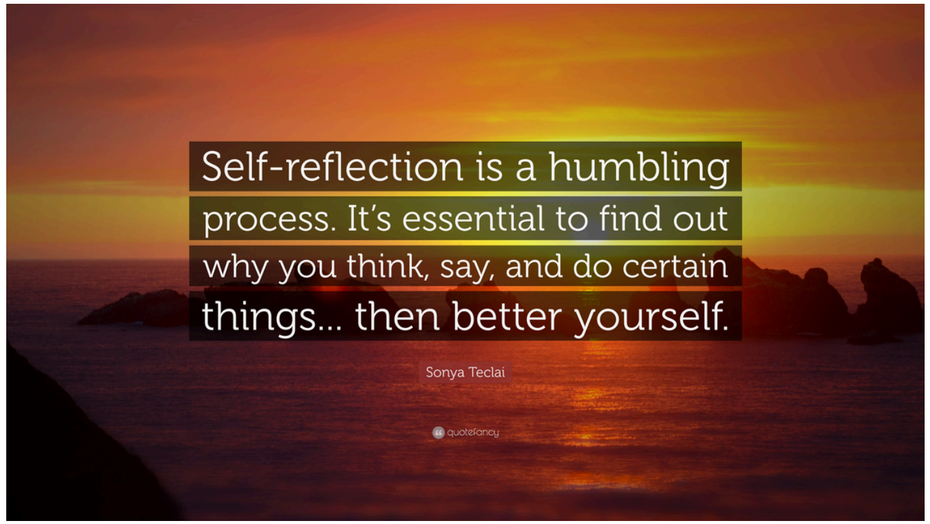

Our group carried out the study according to the project guidelines by having our group leader, Ryan, be the interviewer/researcher and the other two members of the group, John David and Wayne, be the interviewees. For the scope of the study to be limited, two specific 30 minute direct observation sessions of the Temu app were selected. We focused specifically on the interface problems that most impact the user, such as pop-up ads during a promotion, navigability of the application and technical performance.

REFLECTION & FUTURE RECOMMENDATIONS

Reflection: Reflecting on this activity, it was beneficial for our team to follow the structured roles to be able to conduct the interviews and get instant qualitative feedback about the user experience of the app. Our results were, however, only applicable to members of the internal group, and therefore subject to peer response bias. Further, since we didn't use formal consent documentation because we were working within our team, it is good practice to have formal consent documentation for standardized research.

Beyond the activities in this section, in future iterations of the project we would like to recommend having a larger number of participants, including external and neutral shoppers, to get a wider user perspective. We would also do structured, task based usability testing like asking people to do things such as "Find the product" or "Use the coupon code" instead of "browse. Finally, we would ask for formal written consent before taking recordings and monitor quantitative data such as task completion time, navigation errors, etc., in addition to qualitative data such as feedback.
